Torres
tropical

Torres Tropical is an importer / producer of fresh tropical fruit from all over the world. Over the last 10 years, we have consolidated ourselves as one of the main suppliers for the most important supermarket chains in Europe.

To achieve all of this, we rely on the great support of our subsidiary company, Torres Brazil. This allows us to bring a wide range of products into our portfolio. Clients are delighted with its quality!

Managing the whole chain is a continuous focus for our team. The freshness and overall quality is evaluated in every step of the supply chain. Apart from product quality, we ensure that our suppliers' partners are up to date with, and aligned to the marked demands of certification and safety.

Torres Tropical differentiates itself for being a proactive and open-minded company, always willing to collaborate and generate new business strategies. In addition to the market needs for certification, i.e. IFS, SEDEX, Fairtrade and BIO Skal; Torres Tropical acknowledges daily the responsibility towards a more sustainable supply.

Our brand

Since 2013, Belleza has distinguished itself as a brand that stands for high quality fresh tropical fruits. Through eye-catching packaging, the Belleza concept uses colorful birds, each representing their own product line. Our main Belleza products comply with the highest of quality standards as demanded by the market. We receive constant supply throughout the year, which allows us to make weekly shipments of our exotic products and connected to the demand and wishes of our clients.

Commitment to a Food Safety and Sustainable Responsible Product

Our commitment to sustainability has led us to initiate the organic, untreated and Fair Trade supply chain for our company.

The demand is constantly growing due to the changes in consumer awareness on local impact.

About our Belleza Limes

The Brazilian and the Colombian Tahiti lime is year around available.

It is selected and packed in our own packing houses or from supplying partners.

Also Mexican Persian limes are part of our portfolio. The client has the option to choose for the more juicy Tahiti limes or for the darker skin colored Persian limes

On top of that, we can also offer our client the chance to receive a conventional, untreated, organic and/or Fair Trade product.

Our lime farm in Bahia

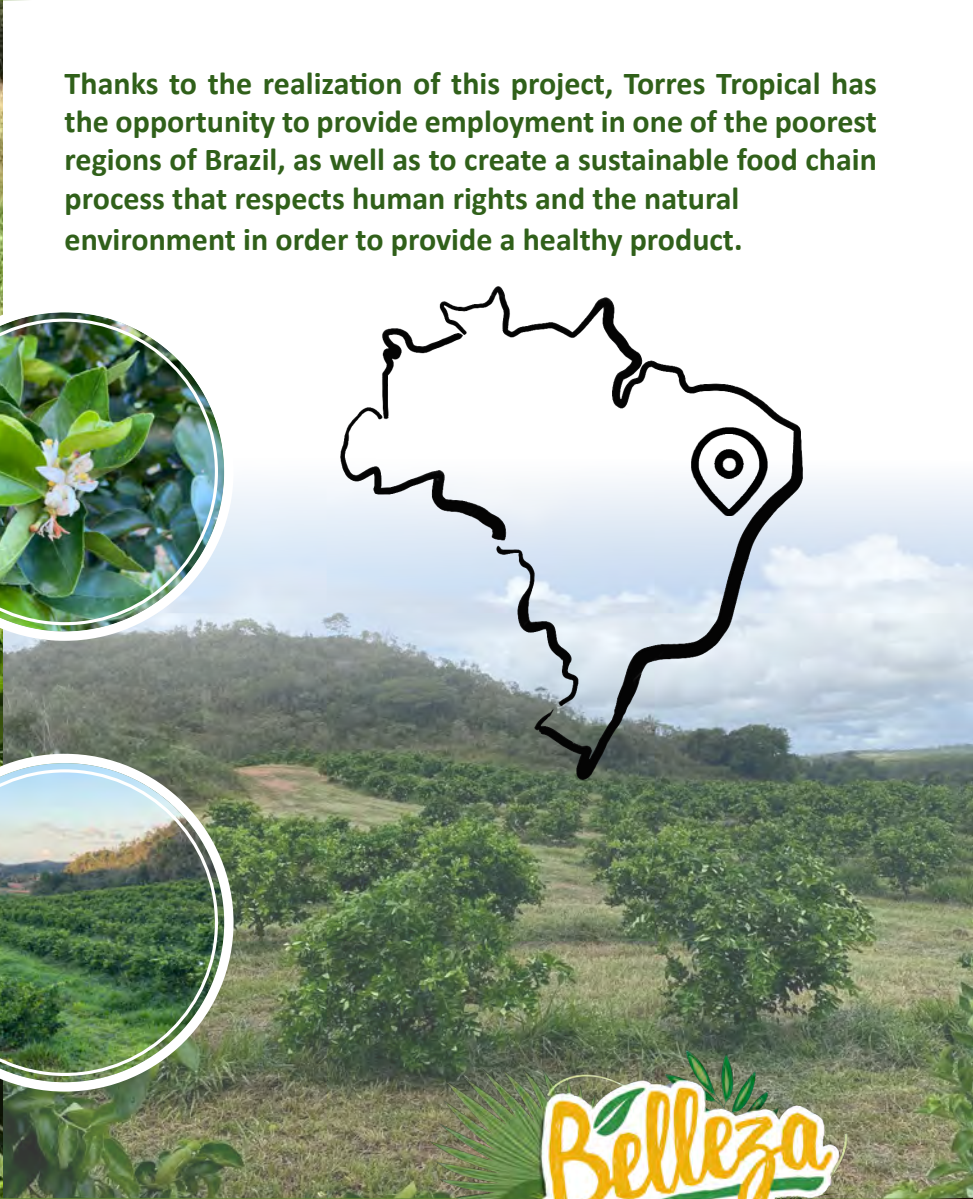

In 2018, Torres Tropical started a project to initiate an eco-friendly production of limes.

As most of the “lime production” in Brazil requires chemicals and post-harvest substances, we are lowering the use of chemicals to close to zero. By not using any post-harvest treatments, we are able to market our Limes as “Untreated”.

Thanks to the realization of this project, Torres Tropical has the opportunity to provide employment in one of the poorest regions of Brazil, as well as to create a sustainable food chain process that respects human rights and the natural environment in order to provide a healthy product.
